

Gulf South Surgery Center

Endoscopy Procedure Instructions

Please be able to provide the following information the morning of your procedure:

- A current list of medications
- A brief written medical history containing any pertinent health problems, major surgeries, and any medication or food allergies.

We are located on the corner of 13th Street and 31st Avenue in Gulfport. You will park on 13th Street and come in the north entrance. You will need a driver to take you home due to the sedation you will receive for your procedure.

You will need to sign in at the front desk in the waiting area and be able to provide a **picture ID and insurance card**.

Your arrival time is subject to change in the event that there are any cancellations or other schedule changes. Someone from our department will call you the day before your appointment to confirm your arrival time.

If you normally take blood pressure medication in the morning, we ask that you take **ONLY** those medications with a small sip of water. All other medications can be taken after your procedure.

If you have any further questions, you may call our office at 228-822-8708.
